SKILLS

- **Languages:** Typescript, Javascript, HTML, CSS
- **Tools:** React.js, Node.js, Express, MongoDb, Next.js, SASS, SCSS, jQuery, Webpack, Adobe Photoshop

WORK EXPERIENCE

Cocktail Curations   January 2020 - Present
Web Developer   Alexandria, VA

- Constructed a React.js based website to replace the current Squarespace website using Prismic.io to allow for a user-friendly experience adding in blog posts and images.
- Launched the company's Shopify e-commerce website with the Liquid templating language and successfully drove over $13,000 in online sales and nearly 6,000 website hits in the course of 6 months.

PRG Hospitality   January 2018 – June 2019
Senior Manager   Washington, DC

- Planned and opened the company's new 125-seat restaurant (Declaration Nats Park) and exceeded initial sales forecasts of $40,000/month by an average of $12,000 in the first year.
- Tasked with assisting the company in managing and overseeing the operation of all four restaurants in the restaurant group after successfully launching and leading Declaration Nats Park.

Lincoln   December 2016 – January 2018
Hospitality Manager   Washington, DC

- Established a data-focused, Excel-based management system for multiple facets of operating a restaurant including a tip-payout system, an events payroll system, and numerous profit/loss analyzers.
- Reduced overall labor costs by 2.5% within first eight months without compromising service or efficiency in the front of house by redistributing areas of responsibility and creating a culture focused on teamwork.

PROJECTS

Portfolio Website   React.js, Typescript, SASS, Framer

- Created a unique and responsive portfolio application used for showcasing my personal projects
- Leveraged the Framer API and React.js to create a complex, yet user-friendly website navigation system

Cocktail Curations   Next.js, SASS, HTML, Framer, Prismic

- Deployed a marketing-driven, SEO-focused company website using Next.js SSG with a 90+ Lighthouse score.
- Implemented a user-friendly blog and gallery system using Prismic.io for headless content management

Staxx The Game   Node.js, Express, MongoDb, jQuery, SASS

- Engineered a user-friendly and mobile-compatible arcade game using object-oriented Javascript where the player is required to stack objects to the top of the board as the game becomes increasingly harder as they progress.
- Coded a REST API with Node.js and Express to communicate with MongoDb to store/retrieve high-scores

Charred Food   React.js, Node.js, Express, MongoDb, SASS

- Built a React.js based, responsive restaurant website with MongoDb support to allow for menu item changes
- Programmed a REST API with MongoDb, Node.js, and Express to enable contact services and menu changes

EDUCATION

Montgomery College
Associate of Arts: General Studies
